Agnieszka Bartosiak
Director, Regional Controlling & Data Management
Agricultural Solutions North America

Agnieszka Bartosiak, an established leader and finance professional, is an executive team member and the head of controlling and data management for BASF Agricultural Solutions North America. She is accountable for leading a diverse range of financial topics and decisions that affect strategic growth and business development. Agnieszka joined BASF through a professional development program, designed to foster future leaders of the organization. Her 20-year BASF career spans across the U.S., Canada and Germany, and encompasses vast collaboration and partnership across BASF worldwide. She is a firm believer in driving change, unleashing further potential and treating every challenge as a new opportunity. “Individually, we can only achieve so much but together we can achieve much more.”

Agnieszka holds a Bachelor of Science degree from St. Peter’s University and a Master of Business Administration from Seton Hall University, New Jersey. From an early age, she has been inspired by her grandfather, who through his own hard work, instilled in her the following advice, “Learn as much as you can…the knowledge and experiences you gain will shape the person you become…this is the one thing no one can ever take away from you.”
