

Transportation & Infrastructure Summit

AUGUST 27, 2020 | VIRTUAL

Reid Campbell, PE
Senior Project Manager - Water
AECOM

Mr. Campbell has extensive experience in planning, design, and operation of municipal, industrial, and private water and wastewater utilities. His responsibilities and experience have ranged from capacity analysis of existing systems and master planning with modeling, to design of both water and sewer infrastructure.

He is a profession engineer, as well as held licenses as a water treatment plant operator; a water distribution system operator; and as a wastewater treatment plant operator (both biological and physical/chemical). He has both a master's and bachelor's degree from Virginia Tech. Mr. Campbell currently manages projects for public, federal and private utilities that range from operations and compliance to design.
