Briana Faulk
Senior Engineer, Technical Support
Dell Technologies

Briana has been in the IT industry for over 9+ years. She holds a Computer Networking degree and Data storage and Virtualization (renamed Cloud Technology) diploma from Wake Tech with various industry level certifications.

She is currently working as a senior engineer on the CI (Converged Infrastructure) & PowerFlex support team at Dell Technologies. In her current role she is the subject matter expert for Virtualization, Compute and Networking issues.

Briana also teaches CompTIA Network+ at Wake Tech as a part-time adjunct instructor.

Outside of her normal role Briana enjoys finding ways to mentor and inspire the younger generation to follow their dreams. She is also a part of Dell's WIA (Women in Action) ERG (Employee Resource Group) and she is currently the Co-Finance lead for the Eastern chapter.

When Briana is not volunteering or working, she enjoys traveling and spending time with family and friends.
