- Nuclear Energy
- Projects
- Minerals, Metals and Materials Supply Chains

M.C. Hammond has been practicing nuclear energy law for nearly 10 years at both Pillsbury and the Department of Energy (DOE). She recently returned to Pillsbury from the DOE, where she advised on over \$2.9 billion in nuclear loans and awards within the past three years.

While at DOE, M.C. served as the lead nuclear regulatory counsel for the Department's \$1.52 billion loan guarantee for the first-of-a-kind restart of the Palisades Nuclear Generating Station. M.C. was also nuclear regulatory counsel for the DOE's Civil Nuclear Credit Program's \$1.1 billion award to Diablo Canyon Power Plant, including extensive advice on National Environmental Policy Act (NEPA) issues.

She also co-led the development of a groundbreaking \$300 million Advanced Reactor Demonstration Program award for Kairos Power at the DOE.

During her time at Pillsbury, M.C. advised clients on complex licensing and enforcement proceedings before the NRC, including license renewals, license transfers and the first below-ground-interim-storage facility for spent nuclear fuel.

M.C. is also a leading practitioner in nuclear liability law and has—by invitation of the International Atomic Energy Association—taught workshops on nuclear liability law and regulation to nuclear newcomer countries, including in the Baltics, Southeast Asia and the Middle East.

Professional Highlights

- Northwestern University Law Review, Editor-in-Chief
