

79th Annual Meeting

MARCH 18, 2021 | VIRTUAL

Timothy L. Humphrey
Vice President, IBM Chief Data Office, and NC Senior State Executive IBM and RTP Senior Location Executive
IBM

Timothy Humphrey is currently Vice President, IBM Chief Data Office, with a mission to deliver a trusted, enterprise-wide data and AI platform for transforming IBM. He is also the Senior State Executive for IBM in North Carolina and Senior Location Executive for IBM in Research Triangle Park, NC, one of the company's largest sites.

Previously, Tim held various IBM executive roles spanning Analytics, Artificial Intelligence, Data, Acquisitions, Supply Chain, and Sales Support. He led IBM's efforts to transform into the premier cognitive enterprise by embedding Artificial Intelligence into internal business processes across the company. Prior to joining IBM's supply chain organization in 2011, Tim held several engineering roles leading the design, development and launch of several technologies and offerings for Lenovo and the former Personal Computer Division of IBM. Tim has over 20 years of global experience in the computing industry with experience in technical support, hardware & software development, quality assurance, and battery technology. He has earned numerous patents as well as management, innovation, and excellence awards for his contributions to the computing industry.

Active in the community, Tim engages in several non-profit fundraising activities, special events, and volunteer efforts. He serves as a board member for many local non-profit organizations. Tim is also a very active mentor to over 30 global professionals, students, and youth.

Tim graduated from North Carolina State University in 1996 with a Bachelor of Science degree in Electrical Engineering and is a member of the North Carolina State University Electrical and Computer Engineering Hall of Fame. Tim is a North Carolina native and currently resides in Raleigh, NC.
