

WOMEN A FORCE IN BUSINESS

NOVEMBER 16, 2021 > RALEIGH CONVENTION CENTER WITH VIRTUAL OPTION

Andrea Rekrut
Senior Manager, Process Engineering and New Products Program
Management
Dell Technologies

Andrea Rekrut is a Senior Manager, Process Engineering and New Products Program Management at Dell Technologies at the Apex Manufacturing facility, responsible for Process Engineering and Project Management. Andrea is responsible for leading the local manufacturing team through the digital transformation into a factory of the future, utilizing industry 4.0 technology. With her team of project managers, they seamlessly introduce several new products a year and engage in other cross-functional strategic initiatives. She has been with Dell for over 18 years, starting as a college student through the co-op program.

Andrea has also held a board position with the Apex Chamber, leads the local wellness committee and the women in action employee resource group for the Dell North Carolina sites. Andrea has a deep passion for encouraging girls to do and be anything they want to be. Besides that, she enjoys spending time with her family (husband and 3 girls that are 18, 10, and 8). She graduated from NC State with an MBA a few years after completing her BS in Industrial Engineering.
