

AN NC CHAMBER EVENT

Manufacturing Summit

APRIL 10, 2019 | CHARLOTTE, NC

Keith Staninger

**Portfolio Leader, Digital Solutions and Controls Compression Technologies and Services, General Industry Division
Ingersoll Rand**

Keith Staninger joined Ingersoll Rand in early 2018 as the digital strategy and controls leader, focused on its industrial and compressed air systems business. He is responsible for transforming the business into a connected portfolio and delivering digitally enabled services for customers. Capabilities such as system level continuous commissioning, remote monitoring and diagnostics, controls technologies, machine learning and system modeling are a combination of passion and job responsibility.

Over almost 20 years, Mr. Staninger has been in the technology segment of the industrial manufacturing space, focused on how technology, products and customer applications come together. He started his career in field engineering focused on manufacturing data and progressed throughout different disciplines since that time. Mr. Staninger has held positions in global sales leadership, global technology strategy and global business management over different periods of his career.

He graduated from Purdue University, West Lafayette, with a degree in computer integrated manufacturing. He also has an MBA in strategic marketing from the University of Wisconsin and attended Rutgers University for a graduate certificate in Finance. He maintains his Purdue relationship with speaking engagements, curriculum reviews for emerging technologies and recruiting.
