Jeffrey Tyburski is a Principal Geologist based in Raleigh, North Carolina with over 32 year of experience in the environmental consulting field. He specializes in providing turn-key environmental Brownfields redevelopment solutions to support property due diligence and acquisition, site redevelopment design, site construction, and post-occupancy property management. Throughout his career, he also has provided a wide variety of environmental services for public and private sector clients under Federal and State regulatory programs across the United States. He has participated in a variety of regulatory stakeholder and advisory groups to develop environmental legislation and guidance. Through his involvement with Brownfields redevelopment projects, he has recognized the importance of beneficial reuse of urban soils to promote sustainable redevelopment practices. Jeff received his bachelor's degree in geology from the University of Rochester.
